

Océ | Print Exec LT

Job creation and submission software

Makes professional printing easier than ever

If creating and submitting print jobs is crucial for your business, Océ Print Exec[®] LT will save you time and trouble. Thanks to its ease of use, predefined job settings, direct device feedback and a web-based version, it makes printing easier than ever.

A tool that's focused on your printing business

Océ Print Exec® LT increases efficiency and saves you time in your professional printing work. Whether you're a print service provider, job printer, architect or engineer, or running an in-house repro department, you'll find Océ Print Exec® LT a big benefit to your business.

The easy way to handle your print jobs

Océ Print Exec® LT is easy to use, with its clear, graphical user interface. You have instant access to all main functions, using context-sensitive buttons, menu options and right-mouse-click menus. Saving time in redefining jobs, it's easy to move or copy them from one printer to another.

Save and recall frequently used configurations

If you frequently print similar jobs, you can save the associated job and document settings and recall them for later usage. Just create a job, apply the required configuration and it's ready for submission. There's no need to set all the parameters again.

No need to define printers with real-time device feedback

Making manual entry of printer configurations a thing of the past, the number of rolls, loaded media, software and finishing options are all detected automatically. That means no more mismatches between job settings and printer configurations. Plus constant up-to-date information on device and job status.

Web-based version means no installation needed

Next to the Windows version, a web-based version of Océ Print Exec® LT is also available. This version is integrated on the device controller, so no installation is required. Just point your browser to the printer's web server, and you can create and submit your jobs.

Part of Océ's integrated document management solutions

Océ Print Exec® LT is part of Océ's scalable Engineering Exec® suite of document archiving and distribution tools. These cover the entire document release, capture, archiving, distribution and printing process, offering users highly flexible and modular solutions to their document needs.
